

BugDorm-2E120 Insect Cage [BD2E120]

MegaView Science Co., Ltd.

<https://shop.bugdorm.com> · <https://megaview.com.tw>

Package Contents

- x1 Fabric Cage Body
- x8 Fiberglass Rods (2 spares)
- x4 Two-way Joints
- x4 Feet

Assembling

1. Push one foot onto one end of each of the four rods.
2. Push one rod, foot-end first, into each of the four sleeves of the cage. Foot prevents rods from puncturing sleeves.
3. Push a two-way joint over top of each rod used in Step 2.
4. Thread the remaining two rods through tabs on top of the cage to form an X.
5. Push the ends of these two rods into the top half of each joint used in Step 3 to erect the cage. Make sure rod ends are fully seated in the joints.
6. Lash ribbons around crossed rods.

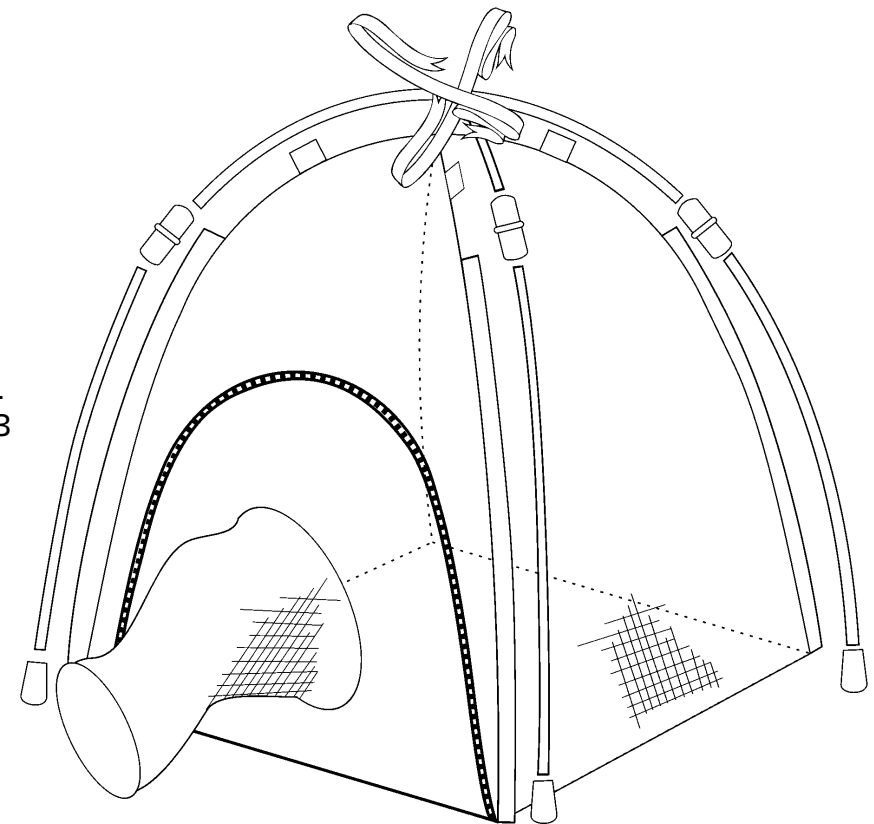

Note

- * Operating Temperature: -10 to 60°C
- * The soft plastic floor is not water proof.
- * Cage fabric is not UV treated. Avoid long-term exposure to direct sunlight.

CLEANING HAND WASH: Submerge and soak the cage for 20-30 minutes in the mix of detergent and water, agitate the cage gently, and then rinse the cage to remove the detergent.

MACHINE WASH: Use the side-loading laundry machine on a washing cycle of low agitation and low-speed spin.

CAUTION: Wash cage body only. Wash at temperature <40 degree. Use a laundry bag if possible when machine wash. Recommend applying neutral detergents. Apply bleach or stain remover with care, as those chemicals will weaken the cage fabric. Dry the cage in the shade.
