

Soil Emergence Trap II - White [BT2016]

MegaView Science Co., Ltd.

<https://shop.bugdorm.com> · <https://megaview.com.tw>

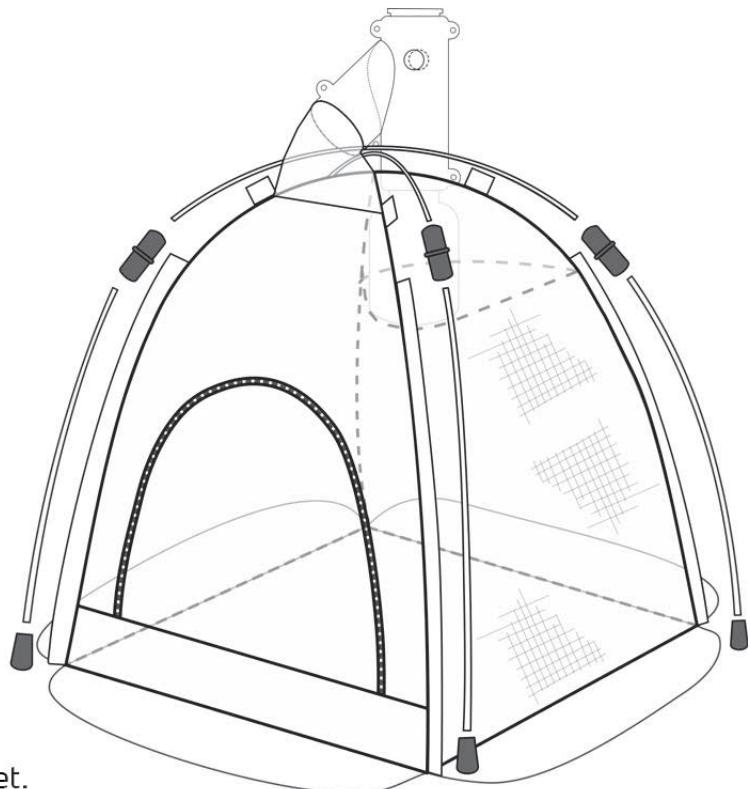

Package Contents

- x1 Fabric Trap Body
- x1 Collection Head (pre-installed)
- x1 Collection Jar (pre-installed)
- x8 Fiberglass Rods (2 spares)
- x4 Two-way Joints
- x4 Feet

Assembly

1. Unscrew and remove the collection jar from the bottom of the collection head.
2. Push one foot onto one end of each of the four rods.
3. Push one rod, foot-end first, into each of the four sleeves of the trap. Foot prevents rods from puncturing sleeves.
4. Push a two-way joint over top of each rod used in Step 3.
5. Thread the remaining two rods through tabs on top of the trap to form an X.
6. Push the ends of these two rods into the top half of each joint used in Step 4 to erect the trap. Make sure rod ends are fully seated in the joints.
7. Pour the killing agent into the collection jar and screw it back to the collection head.
8. Put the collection jar into the zippered pocket on top of the trap. The collection head should sit over the top of the crossed rods.
9. Fasten ribbons inside the zippered pocket around the collection jar and zip up the pocket.
10. Pull ribbons on the trap top above the rods and fasten them around the bottom of the collection head.

IMPORTANT Steps 9-10 ensure the collection head erects to its optimal position. Do not skip those two steps.

Each trap component can be purchased and replaced separately in case of loss or damage. To replace the collection head or fabric trap body, please refer to the manual "Trap Collection Head with Cap Top [BT0004]" included in the package for detailed instructions.
